*A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.*

Edward Stickney Wood, Professor of Chemistry in the Medical School, died on the 11th of July, 1905, in the sixtieth year of his age. Dr. Wood was appointed assistant professor of chemistry in 1871, and at the end of his five-year term as assistant professor he was promoted to be full professor, being at the time thirty years old. He had received a very thorough training in medicine, having cherished a definite purpose to be a physician even before his entrance into Harvard College. When he entered on his duties as assistant professor, the Medical School was supplying instruction in general chemistry, and Professor Wood for years gave much of this elementary instruction; but he gradually developed valuable courses in medical chemistry proper, and before his death had seen all the resources of his department in the School devoted to that subject. As a teacher he was clear, systematic, and convincing. He bore a large part during the last thirty years in improving the teaching of chemistry as applied by medical practitioners and health officers; and he repeatedly served on public commissions in which a medical and chemical expert was needed. His most useful public service, however, was as an expert witness in murder trials. He had a remarkable knowledge of poisons and of the means of detecting their presence in the human body,...
