

Learning SQL Server 2008 Reporting Services: A step-by-step guide to getting the most of Microsoft SQL Server Reporting Services 2008

By Jayaram Krishnaswamy

Shroff Publishers/Packt, 2009. Softcover. Book Condition: New. 18 x 23 cm. Microsoft SQL Server Reporting Services 2008 is the third generation Microsoft reporting software that is more tightly integrated with SQL Server 2008 than ever before. It provides a complete server-based platform that is designed to support a wide variety of reporting needs, including managed enterprise reporting, special purpose reporting, embedded reporting, and web-based reporting. Ideal for beginners who need to create reports as quickly as possible, this book will lead you through practical examples to teach you a full range of skills for reporting with SQL Server 2008 Reporting Services. A series of carefully picked exercises help you practice the most important aspects of report creation. By the end of the book, you will have the confidence to take on the most complex of reports, and be producing reports that will make you the envy of your organization. Learn to create and deliver attractive, data-rich reports with SQL Server 2008 Reporting Services. What you will learn from this book: Install SQL Server 2008 and configure the SQL Server Reporting Services. Learn the various components and tools that enable end-to-end support for all reporting activities. Use the report viewer control...
