At any rate, the gain, if there is any, is not clear enough to compensate for the undesirable complication of the formula. Though the several co-efficients of Laplace s formula need perhaps to be modified according to more recent and probably more accurate determinations of the physical constants on which they defend, as has been proposed by Plantamour, E. Hitter, and lately by the writer himself in a paper read before the American Association for the Advancement of Science at their meeting in Montreal, they have been retained in preparing the following tables, partly because it was found that the errors due to the various co-efficients nearly compensate each other; partly on the ground that, until a severe test, by means of actual comparative measurements made for the purpose, has shown the expediency of these modifications, it seemed...
