RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. Original publisher: Portland, OR : U. S. Dept. of Agriculture, Forest Service, Pacific Northwest Research Station, 2008 OCLC Number: (OCoLC)277733073 Subject: Forest management -- Decision making. Excerpt: . . . GENERAL TECHNICAL REPORT PNW-GTR-766 of expected value, by which the loss is multiplied by its associated probability of occurrence to provide a measure of risk ( Kaplan and Garrick 1981 ). By this mea- I think that as line sure, risk is the probability-weighted value attached to a negative outcome or loss, officers what were the determination of which involves two dimensions: one associated with the con- really called upon to sequence itself, and the other associated with its likelihood. do is manage risk. Because virtually all human activities involving decisionmaking have uncertain outcomes, and outcomes have the potential to result in loss, risk is an important consideration in decisionmaking independent of whether it can be formalized in terms of the expected value calculus noted above. Indeed, from a large body of research spanning a great number of decisionmaking domains, it appears that although people consider risk in their decisions, there is little evidence that they do...
