We made some experiments in which the obstacle was a perfectly opaque substance, and in different experiments we varied the distance a 0 from 20 inches to 15 feet, and OC from 3 inches to 13 feet, but the displacement when measured and l educed was always found nearly to coincide with that given by theory. All the phenomena observed will be at once accounted for, when it is recollected that the edge of a cloud is not a dark opaque body, but.capable of becoming highly luminous. J. M. W. ADDITIONAL NOTE ON THE EQUIANGULAR SPIRAL. (Vide wpra, p. 5.) By William Allen Whitworth, B.A. The reader has perhaps observed that the property enunciated in the second proposition of our former paper is not a peculiar...
